Detroit Metro Area, MI · hollinsrheyya@gmail.com · LinkedIn · Portfolio

SUMMARY

Web Designer & Developer with hands-on experience designing and building responsive websites, user-friendly interfaces, and database-driven applications. Skilled in Figma, WordPress, Elementor, HTML, CSS, JavaScript, and Supabase, with experience applying UX/UI design principles. Combines a background in psychology with technical development skills to translate business needs into intuitive, functional digital experiences.

EXPERIENCE

GETT SMART | Detroit, MI — June 2025 – Present

Web Developer

- Develop and maintain a responsive WordPress learning platform integrated with Supabase, supporting digital literacy education.
- Design and develop responsive course, lesson, and quiz interfaces, incorporating intuitive navigation and learner progress tracking.
- Implement front-end functionality and backend integrations for authentication, content delivery, and user progress.
- Troubleshoot website functionality, responsive layouts, and technical integrations to maintain a reliable user experience.
- Collaborate with developers and stakeholders to implement new features and improve platform usability.

Apple Developer Academy Renaissance Program | Detroit, MI — July 2023 - June 2024

Software Developer Intern

- Contributed to mobile and web application development, including feature implementation, testing, debugging, and workflow improvements.
- Collaborated with designers and developers to refine application interfaces, identify usability issues, and support application functionality.

Apple Developer Academy | Detroit, MI — August 2022 - June 2023

iOS Development Student

- Collaborated in Agile teams to design and develop iOS applications from concept through deployment, contributing to prototyping, feature planning, development, and project presentations.

PROJECTS

Just Smash It Restaurant Website | WordPress, Elementor, Web Design & Development

- Led the end-to-end website design and development process, including client consultations, requirements gathering, layout planning, visual design, and launch.
- Designed and developed a responsive WordPress website featuring customized menu layouts, location information, and online ordering pathways.
- Managed hosting configuration, mobile optimization, and ongoing website maintenance to ensure functionality and a consistent user experience.

Code Breaker Media Website | WordPress, Elementor, Web Development

- Developed a responsive, one-page media website featuring organized content sections, brand information, and contact inquiries.
- Designed page layouts and navigation to create a cohesive visual experience across desktop and mobile devices.

QuickVent Website Design | Figma, Wireframing, UI Design

- Created low-fidelity wireframes and high-fidelity website designs for a service-based business.
- Applied visual hierarchy and user-centered design principles to organize service information and contact pathways.

SKILLS

- **UX Research & Planning:** User Personas, Empathy Mapping, User Journey Mapping, User Stories, Requirements Gathering
- **UX/UI Design:** Figma, Wireframing, Prototyping, Task Flows, Storyboarding, UI Design, Responsive Design
- **Web Development:** HTML, CSS, JavaScript, TypeScript, WordPress, Elementor
- **Platforms & Tools:** Git, GitHub, Hostinger, Supabase, PostgreSQL
- **Backend & Frameworks:** C#, .NET, Angular, REST APIs, SQL
- **Development Practices:** Debugging, Testing, Agile Development, Cross-Functional Collaboration

EDUCATION

Grand Circus C# .NET/Java Bootcamp | Detroit, MI — October 2024 - April 2025

- Completed an intensive 28-week program focused on backend development, API, database design, and full-stack application development.

Michigan State University | Honors College | East Lansing, MI — May 2022

Bachelor of Arts, Psychology
